AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

LISTING OF CLAIMS:

1. (Currently Amended): A process for the production of L-ascorbic acid comprising:

(a) contacting an enzyme with a substrate which is selected from the

group consisting of L-gulose, L-galactose, L-idose, and L-talose;

(b) converting the substrate directly into L-ascorbic acid by catalytic

eatalytical activity of the enzyme under suitable culture conditions; and

(c) isolating L-ascorbic acid from the reaction mixture,

wherein said enzyme has (1) the amino acid sequence of SEQ ID NO: 2 or (2) an

amino acid sequence with 90% sequence identity to SEQ ID NO: 2 and with the activity

to produce L-ascorbic acid or (3) an amino acid sequence encoded by the DNA

sequence of SEQ ID NO: 1 or (4) an amino acid sequence encoded by a DNA

sequence that hybridizes under stringent hybridization and wash conditions to the DNA

sequence of SEQ ID: 1 and having the activity to produce L-ascorbic acid.

2. (Currently Amended): A process for the production of L-ascorbic acid

with an enzyme having (1) the amino acid sequence of SEQ ID NO: 2 or (2) an amino

acid sequence with 90% sequence identity to SEQ ID NO: 2 and with the activity to

produce L-ascorbic acid or (3) an amino acid sequence encoded by the DNA sequence

of SEQ ID NO: 1 or (4) an amino acid sequence encoded by a DNA sequence that

hybridizes under stringent hybridization and wash conditions to the DNA sequence of

3

Amendment Dated: November 12, 2007 Reply to Office Action Dated: May 11, 2007

SEQ ID: 1 and having the activity to produce L-ascorbic acid, whereby L-ascorbic acid is produced from a substrate which is selected from the group consisting of L-gulono-1,4-lactone, L-gulonic acid, L-galactono-1,4-lactone, L-galactonic acid, L-idono-1,4-lactone, L-idonic acid, L-talono-1,4-lactone, and L-talonic acid,

said process comprising the steps of:

- (a) contacting the enzyme with the substrate,
- (b) converting the substrate <u>directly</u> into L-ascorbic acid by <u>catalytic</u> eatalytical activity of the enzyme under suitable culture conditions; and
 - (c) isolating L-ascorbic acid from the reaction mixture.
- 3. (Withdrawn): A process for the production of L-gulono-1,4-lactone or L-gulonic acid with an enzyme having the amino acid sequence of SEQ ID NO: 2 or an amino acid sequence that is 90% identical thereto, with the activity to produce L-gulono-1,4-lactone or L-gulonic acid, whereby L-gulono-1,4-lactone or L-gulonic acid is produced from L-gulose.
- 4. (Withdrawn): A process for the production of L-galactono-1,4-lactone or L-galactonic acid with an enzyme having the amino acid sequence of SEQ ID NO: 2 or an amino acid sequence that is 90% identical thereto, with the activity to produce L-galactono-1,4-lactone or L-galactonic acid, whereby L-galactono-1,4-lactone or L-galactonic acid is produced from L-galactose.
 - 5. (Cancelled).
- 6. (Previously presented): A process according to claim 1, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.

Amendment Dated: November 12, 2007 Reply to Office Action Dated: May 11, 2007

- 7. (Original): A process according to claim 6, wherein the process is conducted at a pH of about 2 to about 8 and at a temperature of about 18°C to about 42°C.
- 8. (Currently amended): A process for producing L-ascorbic acid comprising (a) contacting a substrate which is selected from the group consisting of L-gulose, L-galactose, L-idose, L-gulono-1,4-lactone, L-gulonic acid, L-galactono-1,4-lactone, and L-galactonic acid with an enzyme derivable from *G. oxydans* DSM 4025, (b) converting the substrate directly into L-ascorbic acid by catalytic eatalytical activity of the enzyme under suitable culture conditions and (c) isolating L-ascorbic acid from the reaction mixture; wherein the enzyme has the following physicochemical properties:
 - (a) molecular weight of about 60,000 Da on SDS-PAGE;
- (b) substrate specificity for primary and secondary alcohols and aldehydes;
 - (c) pH-stability at pH of about 6 to about 9;
 - (d) pH-optimum at pH of about 8.0; and
 - (e) inhibited by Cu²⁺, Zn²⁺, Mn²⁺, Fe²⁺, and Fe³⁺.
- 9. (Withdrawn): A process for producing L-gulono-1,4-lactone or L-gulonic acid comprising contacting L-gulose with Enzyme B of *G. oxydans* DSM 4025 and isolating L-gulono-1,4-lactone or L-gulonic acid from the reaction mixture, wherein Enzyme B has the following physico-chemical properties:
 - (a) molecular weight of about 60,000 Da on SDS-PAGE;

. . .

Amendment Dated: November 12, 2007 Reply to Office Action Dated: May 11, 2007

- (b) substrate specificity for primary and secondary alcohols and aldehydes;
 - (c) pH-stability at pH of about 6 to about 9;
 - (d) pH-optimum at pH of about 8.0; and
 - (e) inhibited by Cu²⁺, Zn²⁺, Mn²⁺, Fe²⁺, and Fe³⁺.
- 10. (Withdrawn): A process for producing L-galactono-1,4-lactone or galactonic acid comprising contacting L-galactose with Enzyme B of *G. oxydans* DSM 4025 and isolating L-galactono-1,4-lactone or galactonic acid from the reaction mixture, wherein Enzyme B has the following physico-chemical properties:
 - (a) molecular weight of about 60,000 Da on SDS-PAGE;
- (b) substrate specificity for primary and secondary alcohols and aldehydes;
 - (c) pH-stability at pH of about 6 to about 9;
 - (d) pH-optimum at pH of about 8.0; and
 - (e) inhibited by Cu²⁺, Zn²⁺, Mn²⁺, Fe²⁺, and Fe³⁺.
- 11. (Withdrawn): A process according to claim 3 comprising (a) contacting the enzyme with the substrate and (b) isolating the L-gulono-1,4-lactone or L-gulonic acid from the reaction mixture.
- 12. (Withdrawn): A process according to claim 4 comprising (a) contacting the enzyme with the substrate and (b) isolating the L-galactono-1,4-lactone or L-galactonic acid from the reaction mixture.

Amendment Dated: November 12, 2007 Reply to Office Action Dated: May 11, 2007

13. (Previously presented): A process according to claim 2, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.

14. (Withdrawn): A process according to claim 3, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.

15. (Withdrawn): A process according to claim 4, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.

16. (Previously presented): A process according to claim 8, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.

17. (Withdrawn): A process according to claim 11, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.

18. (Withdrawn): A process according to claim 12, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.
